Name: _____ Date: _____

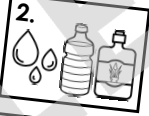

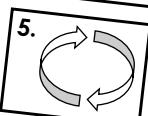

DIY Sanitizer Wipes

Directions: Follow the instructions to complete the experiment.

Supplies needed:

-  1½ cups 99% rubbing alcohol*
-  dry wipes
-  ¼ cup hot water
-  plastic container
-  mixing bowl and spoon
-  2 tbsp. gel aloe

Experiment steps:

-  1. Place wipes into plastic container.
-  2. In mixing bowl, combine hot water, gel aloe, and rubbing alcohol. Stir with spoon.
-  3. Pour mixture into plastic container until dry wipes are fully saturated.
If needed, double liquid recipe.
-  4. Use wipes to clean surfaces and/or hands.
-  5. When wipes dry out over time, re-wet with liquid recipe ingredients.

*the higher the concentration of alcohol, the more effective the sanitizing; Use at least 60%.

All About COVID-19

Written by: Mrs. D's Corner

COVID-19, or Coronavirus, is a virus that can make people sick.

2

This virus is mainly spread from person to person.

3

When an infected person coughs or sneezes, the infected person releases respiratory droplets which contain the virus.

These infected droplets can be inhaled or transported via touch to a person's mouth or nose, and make another person sick.

2-14
days

Symptoms of COVID-19 range from mild to severe, and can appear anywhere from 2 to 14 days after exposure.

Fever, cough, and shortness of breath are common symptoms of COVID-19.

If you do become ill with Coronavirus, you should stay home and get medical treatment.

You should also limit your exposure with other people. This may also be called quarantine.

If you have COVID-19, wear a face mask, cover your mouth and nose when you cough or sneeze, and wash your hands frequently.

10

There are steps you can take to prevent yourself from getting sick too.

11

Wash your hands often and wash your hands for at least 20 seconds each time with soap.

12

If soap and water is not available, use hand sanitizer with at least 60% alcohol content.

13

And don't touch your face or any parts of your face with unwashed hands.

Public health emergencies can be stressful for communities. Make sure you are sharing accurate information about COVID-19, like what you learned in this book.
